

SmartRun by Flygt (a Xylem Brand)

SmartRun is a wastewater and sewage control unit, pre-programmed to optimise the performance of any pump or pump station

SmartRun is ideal for applications such as:

- Schools
- Exhibition Venues
- Nursing Homes
- Shopping Centres
- Prisons
- Transport Hubs

- **Fewer Callouts:** Pump Station callouts and tanker costs are significantly reduced when you install SmartRun to control your pump station
- **Auto Triggering:** Abnormal blockages trigger a SmartRun cleaning cycle, rotating the pump impeller back and forth to release clogged debris
- **Auto Pipe Cleaning:** An automatic pipe cleaning cycle flushing the discharge pipe properly at full pump speed and flow
- **Auto Sump Cleaning:** This pumps down the liquid to snoring level, removing debris and reducing sedimentation
- Up to 50% energy savings, SmartRun adaptively finds pump speed, flow, pipe friction loss to maximize pump efficiency
- Pre-programmed ramps, reducing wear and tear for pump and valves
- Easy commissioning, just press "Auto" for start up
- Alarms for "pump condition" and "high level" Volt free contacts for linking to your BMS or telemetry systems

For selection and specification please contact Pump Technology Ltd.
