TECHNOLOGY LTD

Grease Buster Plus

● SITING THE UNIT:

The Grease Buster Plus is supplied with 4 metres of flexible PVC tubing to allow for convenient location.

● BENEFITS:

- Comprehensive dosing package for grease separators and drains.
- High quality stainless steel wall mounted enclosure.
- Neat and clean to match existing commercial kitchen fixtures.
- System supplied with a 12.5 litre bottle of Bacti-G and programmed for standard dose.
- Uses tried and tested components that require no maintenance.
- Tamper proof - nothing open to accidental damage.
- Bacti-G is fully enclosed to minimise risk of accidental spillage.
- Battery, mains operated and mains with BMS versions available to suit all situations.
- BMS version alerts power failure and liquid depletion.
- Supplied pre-programmed with all the necessary fittings required for installation.
- Supplied with full instructions for installation and re-programming if necessary.
- Can be fitted to new or existing installations.
- Negates unpleasant and time consuming manual dosing.

● CARE & MAINTENANCE:

REGULAR CARE AND MAINTENANCE IS ESSENTIAL to ensure a long and trouble free service life.

Pump Technology Limited operates a comprehensive care and maintenance service including digestion product supply and planned maintenance visits.
