

Advertising Feature

Making sure that you get exactly the right pump or part every time with facetime, WhatsApp or skype! (or just a good old phone call)

Identifying EXACTLY what pump or part you need:

They say that "A picture (or video) is worth a thousand words"!

At Pump Technology Ltd. we think that it's a great way to identify the replacement pump or spare part that you need.

What to do:

Just call the Pump Technology Ltd. hot line - **0118 9821 555**.

We will work with you to identify your pump and offer you a new or like-for-like replacement.

As part of our service, one of our engineers will also offer to facetime, WhatsApp or skype with you to "virtually" take you to our warehouse where they can show you EXACTLY what you need. it's a great way to view and discuss your broken or replacement pump or spares requirements.

This will mean that we know what you want and you have full confidence in what is being dispatched to you.

The range of pumps available vary from a small, £60 wastewater drainage pump up to a £10,000 Flygt sewage pump.

Proven Expertise:

Pump Technology Ltd have a proven "one stop shop" that can almost always solve the problem. Between them their team of wastewater and sewage pump experts have many years of pump knowledge - Amanda- 17, Mathew- 17, Mark 12 - and a comprehensive knowledge of pump jargon and product reference codes.

Their knowledge is so well respected within the industry that even the manufactures will often pass on enquires to help identify an old pump.

The Pump Technology Ltd. team will advise you on the best product considering specification, price and delivery. If the pump has been superseded they will recommend the optimum replacement matching physical size, pumping performance and motor sizing. If a control box needs updating, then they will also recommend a solution for that.

Next day delivery:

Because of their extensive stockholding, for the many standard pumps, Pump Technology Ltd. can often dispatch pumps for next day delivery.

Keep the number handy and just give us a call – 0118 9821 555.
