More

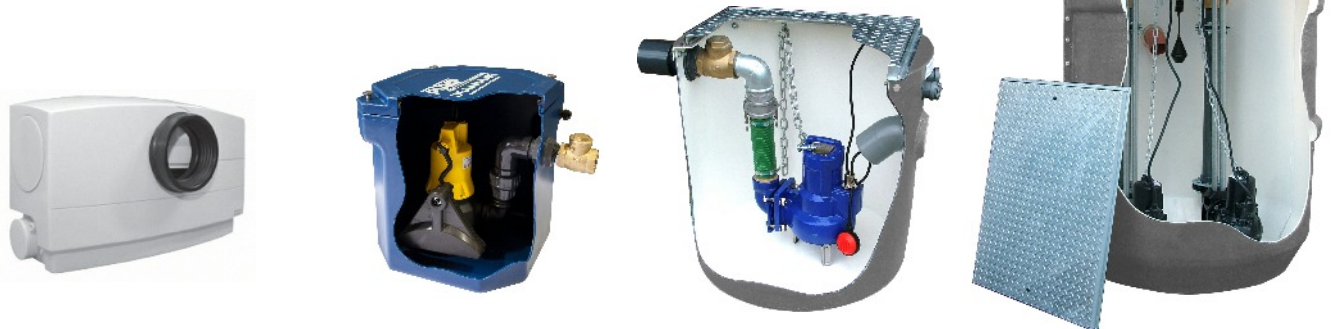

Accessories -

- **Inlet & outlet isolation valves:** Option of sluice valve & gate valve to isolate the unit from inlet and return flow during maintenance.
- **Carbon Air Filter:** All tanks should be vented, ideally externally to the building. If this is not possible a Pump Technology Microvent carbon filter should be used.
- **Control Panels:** Bespoke control panels. Typically they provide automatic changeover of duty pump, duty standby operation, pump assist and alarm functions.

Other Products:

- FlushMaster: Domestic / light commercial behind toilet pumping systems
- DrainMajor[®]: Domestic / commercial floor mounted wastewater pumping systems
- PumpMatic[®]: Below ground sewage pumping stations

"Pentair Jung Pumpen GmbH (Germany) and Pump Technology Ltd unite a long and trustworthy relationship. Pentair Jung Pumpen are proud to have Pump Technology Ltd as an effective partner and stockist for the UK market. This partnership has generated several leading pump projects and Pentair Jung Pumpen is confident in the specification, selection, supply and maintenance work completed by Pump Technology Ltd. We are looking forward to a successful and growing cooperation."
