DrainMinor 30 is the solution

In recently fitted out cosmetic concessions areas within leading chain stores, the installer, Face Edge Ltd., found that gravity discharge for the sinks was not an option, so a different solution was required. The Pump Technology Ltd DrainMinor 30 is a well proven unit, which comprises of a compact GRP tank.

This houses a reliable, float arm activated submersible Jung Pumpen pump which starts pumping as soon as the water draining into the tank reaches the pre-set level. The pump is fitted with a unique low-level float, reducing to the minimum any static water within the tank.

New Packaged Sewage Macerator

JTPumps has released a new Packaged Sewage Macerator pumping stations for the domestic and commercial markets to complement other packaged pumping station. If you don't have gravity flow you will need a pumping station; they can come in all sorts of sizes from very small for an out building/garden room to very large houses and office's. If you are not

sure of the size, that's not a problem. Just call up JTPumps and the company will be happy to help you get the right station for the job.
