

A range of pumps

A small part of the Pump Technology Warehouse

One Stop Pump Shop for replacement pumps immediate delivery right first time

A large proportion of Drainage company work involves fixing blockages. The cause is often an old pump (possibly no longer manufactured) with "hard-to-find" replacement or spares.

Pump Technology Ltd. offer a true ONE STOP PUMP SHOP solution

Although there are literally hundreds of different pump models to choose from, thanks to the Pump Technology Ltd. "One Stop Pump Shop" system, identifying the pump and sourcing a correct replacement quickly and economically could not be easier.

How it works

Simply contact the team on 0118 9821 555 and an experienced pump specialist will almost certainly be able to provide an immediate solution. If there is any doubt about identifying the pump, they are able to work with a simple "phone" picture or via Facetime, Skype, or WhatsApp, to ensure that the replacement is "right first time".

If the requirement is for spares or repairs the team will offer the best solution available to get the pump working and back in service in the fastest possible time.

Partnership

By keeping the Pump Technology Ltd. number - 0118 9821 555 - in their phone drainage engineers have immediate access to a world of pumps and spare parts. No complicated telephone menus of "options", just speak to real person straightaway!

The Pump Technology Ltd, Application Team has years of experience so that they can provide a like-for-like replacement, or, for superseded pump models, recommend the best replacement to match pumping performance and fit.

Pumps are available in a wide range of sizes, capacities and many are available for immediate delivery

A sample selection of brands stocked by Pump Technology

Pumps of all sizes

The Company's warehouse is stocked with a vast range of submersible pumps, from small domestic to commercial units and we can normally dispatch on the same day.

They also stock behind toilet pump units, control panels, floats, charcoal ventilators, pressure booster sets, wet room systems and much more.

Over 26 Years of Experience

Pump Technology Ltd, is a specialist company focusing on wastewater, sewage pump and pump stations. Their staff have been with them for decades, they know drainage pumps inside out and are ready to use that knowledge to solve almost any problem. The Pump Technology Group also includes Pegasus Pumps, a custom tank manufacturing business, and LeeSan, who specialise in Marine, Leisure and Welfare sanitation systems.
