

# The EffluMaxi Range

*Floor Mounted Sewage Lifting Stations. A Proven system!*

- **Ideal for - Casual Dining Outlets, Night Clubs, Pubs, Shops, Offices, Hospitals, Factories, Warehouses etc.**

*The EffluMaxi floor mounted sewage lifting stations is the industry "Bench Mark"- Here's why-*

- **Thousands installed across the UK, more than any other design! Original units over 30 years old and still going strong.**
- **Organisations from Costa Coffee to Southern Water specify the EffluMaxi for greatest reliability & lowest operating costs.**

EffluMaxi 80 Single

EffluMaxi 80 Twin

EffluMaxi 120

EffluMaxi Grinder Single

EffluMaxi Grinder Twin

*If you want a resilient floor mounted sewage lifting station that will handle multiple toilets in busy commercial premises like casual dining outlets to night clubs ask for the EffluMaxi range. It's proven!*

## Special features -

- **Reliability** - Large vortex or heavy duty cutter commercial pumps from Germany, 240v & 3ph options.
- **Tough design withstands user abuse!**  
A strong, rigid fixed float arm assures reliable pump start / stop control. Unlike pickup tubes or pressure sensitive switches the float arm is extremely robust and accurate.
- **Easy install** - 180mm or variable inlet height, plus back & sides inlet options means the ideal pipe layout for your site can be adopted.

**PUMP**  
TECHNOLOGY LTD

More

- **Easy Operation** - Both single & twin EffluMaxi pumping systems come with a dedicated, factory set control panel. All panels are fitted with a high level alarm & volt free contacts for BMS. Just plug in!  
All EffluMaxi's are IP68 rated and have solid fix-down points, so if your plant room floods, your EffluMaxi lifting station will continue operating and not float and damage pipework connections.
- **Easy Inspection & Maintenance** - The proven pump design and build means your pumping system keeps operating, better & longer. That's what our customers confirm! When it does come to inspection & maintenance, multiple dedicated inspection hatches allow removal of debris from tank & non-return valve chambers without removing the pumps.  
Removing pumps & replacing pumps is simple and trouble free. The metal to metal fixings provide far greater reliability than metal to plastic fixings!

---

### There is a proven sewage lifting station for every application-

- **EffluMaxi 80 Single:** Isolated toilets in commercial environments staff, disabled, small restaurant, petrol forecourt.  
Single duty pump, free flow vortex design. Pumps up to 13l/s & 7m head. 70mm solids handling. Complete with control panel & alarm. 240v & 3ph options

Twin pumps, duty / standby, cutter pump design. Pumps up to 4.5l/s & 22m head. Complete with control panel & alarm. 240v & 3ph options

### Accessories -

- **Inlet & outlet isolation valves:** Option of sluice valve & gate valve to isolate the unit from inlet and return flow during maintenance.
- **Carbon Air Filter:** All tanks should be vented, ideally externally to the building. If this is not possible a Pump Technology Microvent carbon filter should be used.
- **Control Panels:** Bespoke control panels. Typically they provide automatic changeover of duty pump, duty standby operation, pump assist and alarm functions.

### Other Products - Sewage pumping systems

- **FlushMaster:** Domestic / light commercial behind toilet pumping systems
- **DrainMajor:** Domestic / commercial floor mounted wastewater pumping systems
- **PumpMatic:** Below ground sewage pumping stations

### Pump Technology Ltd and its Pumping Partners offer nationally:

- The best pump selection for each specific commercial requirement
- Full Installation & commissioning support
- Maintenance & repair contracts nationally
- CPD's / Product reviews / training
