

Cinderella Comfort

Our modern hygienic and efficient incineration toilet complete with information display panel

Cinderella Comfort represents a new concept in incineration toilet systems, raising the Cinderella standard even further.

This incineration toilet provides a significantly better indoor climate and approximately the same comfortable experience as you are used to at home.

The toilet is based on the market leading Cinderella Classic model, which has been sold to more than 50,000 customers worldwide.

The toilet does not require a water supply or drains, and ALL toilet waste is incinerated at high temperatures until only an insignificant quantity of ash remains.

Cinderella Comfort comes with an information display. The display provides continuous information about the use of the toilet and also provides notification when the ash container needs to be emptied.

The model has been designated "Comfort" because it provides a significantly better indoor climate compared to traditional incineration toilets. All air required by the incineration process is supplied from outside the room through a separate pipe, while using no air from inside the toilet room, avoiding potential lowering of room temperature and conflicts with other air-dependent installations such as kitchen ventilation fans, fireplaces and wood burning stoves, etc.

The toilet satisfies current requirements to airtightness of buildings (TEK10) and is delivered with a new type of anti-bacterial toilet seat as standard.

The Cinderella Comfort is our most efficient and hygienic incineration toilet!

Unique advantages

- Made in Norway to highest quality and ecological standards
- Scandinavian design
- LCD information display
- Childproof
- Closed air circuit for optimal incineration process
- Satisfies the TEK10 requirements
- NEMKO and CE approved
- Largest capacity; up to 12 persons
- Automatic notification when it is time to empty the ash container
- No water supply, installation of indoor or outdoor tank required
- Simple installation procedure, requires only mains power, incoming and outgoing air
- Reliable operation.
- Suitable for cold areas
- Hygienic
- Nationwide service network
- 3-year warranty

Seat height	540 mm
Height	600 mm
Width	390 mm
Depth	590 mm
Capacity	Up to 12 people
Ventilation duct / pipes	110 mm external dimensions
Incineration power	2000 W
Energy consumption per incineration	0,8 - 1,5 kWh
Power requirement	220 - 240 V, 10A
