New and replacement Pumps and Accessories - Service Delivery & Price:

Years of experience:

When you call the Pump Technology team on 0118 9821 555, you talk with people who have been in the industry for many, many years and know pumps inside out. What's more, they answer the phone straight away!

Identifying what you need:

Whether it's identifying or selecting the right like-for-like replacement, finding a suitable alternative pump or being given advice on repairs and/or refurbishment, they will have the answer.

So, when a broken pump is responsible for flooded drains or a failed pumping station, simply call Pump Technology or send them a picture and their experts will get to work to provide you with the best solution at the best price.

Not just Pumps:

In addition to pumps, the company can also provide, control panels, alarms, floats, spares and everything you need to keep your business operating effectively and meet your customer's requirements.

One Stop Pump Shop:

With one of the largest UK stocks of pumps, spares and accessories from all the major manufacturers Pump Technology will dispatch goods the same day for you - truly the drainage industry's "One Stop Pump Shop"

What our customers say:

"I first used Pump Technology Ltd, leading up to the London Olympics. They sized and supplied duty standby submersible sewage pumps and a control panel for a pumping station servicing the site services and offices for Morrison Construction during the long build of the Olympic facilities. During this period the reliability of the pumping station was faultless, impressive considering the site environment they were servicing. I continue to find the assistance from the experienced team at Pump Technology Ltd, invaluable, solving pumping problems and matching pumps and control panels to provide reliable pumping systems that I am confident in supplying and installing".

Ricki Foakes, RFM Pipeline (Water & Utility Services)

"We use Pump Technology Ltd, to source all our replacement wastewater and sewage pumps, plus replacement of Saniflo commercial pumping systems as well. They hold a diverse range of pumps and can generally replace like for like, or if a model is now superseded they are excellent at selecting an equivalent, both pumping performance and fit. With their large stocks, new pumps are dispatched to us the same day of enquiry for a next day delivery, their assistance and service means we are always confident in solving our clients pumping problems promptly".
