THE CINDERELLA COMFORT MODERN, HYGIENIC, EFFICIENT & ECO-FRIENDLY

The new concept in incineration toilet systems

This incineration toilet has a closed air system, creating a better indoor environment without affecting the surrounding room temperature.

The toilet does not require a water supply or drainage.

ALL toilet waste is safely incinerated internally at high temperatures until only an insignificant quantity of sterile inert ash remains.

Cinderella Comfort comes with an LED information display providing continuous information about operation and notification when the ash container needs to be emptied.

WHAT IS AN INCINERATION TOILET?

Incineration toilets are a total waste solution.

No additional processes or messy, difficult emptying routines are required.

The system is odourless and hygienic with waste products burned safely at high temperatures in a closed incineration chamber. Incineration gases pass through a catalytic converter, so that no odours or fossil-fuel fumes are expelled through the separate outflow flue.

Only a minimal amount of inert **bacteria free ash** remains safe to dispose of in household waste or on the garden. One teacup for four people after one weeks use.

Incinerator toilets are a popular alternative as they don't require water or access to mains drainage, which can be difficult and expensive, yet they enable a similar level of comfort people enjoy at home without major costs or installation work.

WHY CHOOSE AN INCINERATION TOILET?

The Cinderella, designed in Scandinavia, has been manufactured in Norway for over 20 years. Over 65,000 units have been installed in Scandinavia alone.

The technology used is universally recognised as an environmentally friendly, water-free, total waste handling solution.

Now, the incinerator toilet enables the same level of comfort people enjoy at home without the major costs of water and drainage works.

Where there is limited or no access to power the Cinderella GAS, a propane driven option, is available.

No heavy waste handling
Only light, recyclable ash

Safe
Secure for children

Electric and propane
models available

No odour
Hygienic

No water
Connection

For houses, cabins,
beach huts and other
"off grid" applications

FEATURES

- Complete loo solution – burns all waste
- Reliable; hygienic; highest eco standards
- No water supply or water tank required
- Closed air system - optimal incineration
- Separate intake and outlet air flow
- Comfortable indoor climate – no smells
- Simple plug-in installation
- Large capacity; up to 12 persons
- Auto warning when ash container full
- Made in Norway - Scandinavian design
- LCD information display
- Childproof
- NEMKO and CE approved
- Nationwide service network
- 3-year warranty

BOX CONTENTS

In addition to the Comfort Unit, User and Installation Manuals are supplied, plus 500 bowl liners, external air inlet cover, Flue components and vent cap.

INSTALLATION

Cinderella toilets are very easy to install. In addition to the manual supplied, videos on how to install your Cinderella are available on-line. On You Tube search for Cinderella Eco Group.

- **Select a Location**
Approved for use in wet-rooms (IP34)
- **Ensure the supply of fresh air**
Check for effects on any gas appliances
- **Install the external ventilation pipes**
See typical vent options
- **Connect toilet to power supply**
Plug into an earthed wall socket (10A)

TECHNICAL INFORMATION

Height: 600 mm
Seat Height: 540 mm
Width: 390 mm
Depth: 590 mm

Weight: 34kg
Ventilation: 110mm fittings
Power: 220-240V 10A
Incineration energy consumption: 0.8 – 2 kWh

Capacity: up to 12 people
Certifications: CE, NSF,
NEMKO, UL

High capacity
10 - 12 people per day

Easy installation

Requires little space

Cinderella[®]

INCINERATION TOILETS

When nature calls, it's good to know that a convenient solution is available. Cinderella's incineration toilets are world-class. They are odourless and environmentally friendly. They do not require water. There is no handling of waste. Only an insignificant quantity of safe, inert ash remains.

Partnership

Cinderella have partnered with Pump Technology in the UK giving us direct access to the 20 years experience and expertise that they have with their systems. This will enable us to provide you with the best terms, service and support!
