

DATA SHEET DRAINKING 730 HES TWIN (240V) (Duty/Standby Hot Wastewater Pumping System with Control Panel)

DrainKing 730 HES Twin (240V) Part No. 178/NS (Duty/Standby Hot Wastewater Pumping System with Control Panel. Continuously rated for 90°C Hot Wastewater)

General Description:

DrainKing 730 HES Twin (240V) features a heavy duty tank and submersible pump for automatically pumping "Hot Wastewater" from tea points with zip taps, commercial kitchens, sinks, dishwashers, combi ovens, pasta cookers, glasswashers, washing machines etc.

The DrainKing Twin provides users with the additional security of duty/standby operation. If one pump should become blocked or fail, the wastewater would rise within the common tank, and activate the high-level alarm. The control panel would start the other pump as the standby pump.

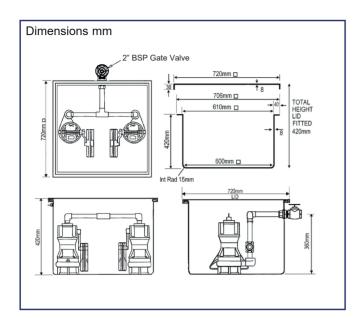

Control Panel:

The DrainKing Twin is supplied with a pump station control panel and a single high-level finger float. The duty pump is automatically alternated after every pump operation. If the high-level alarm is activated the standby pump would become operational. The panel features door isolation switch, pump 1 or 2 operational/tripped lights, alarm buzzer (minimum volume of 80 Dba at 1m distance) alarm on/off switch, 3 off volt free ports for BMS connection.

The alarm is designed for connection to a 240V supply. A rechargeable battery is fitted in case of mains electricity supply failure.

DRAINKING 730 HES TWIN (240V) (Duty/Standby Hot Wastewater Pumping System with Control Panel)

Tank:

Manufactured from GRP and fully rigged with internal pipe work, gate valve and non-return valves.

Tank Inlets:

To suit site layout, all inverts should be brought into the side of the tank by drilling a hole and using an appropriate tank connector. Minimum invert height 155mm.

Tank Outlet:

Fitted 2" BSP male thread discharge outlet (Gate Valve supplied female thread)

Tank Venting:

To suit site layout, a vent should be taken from the side of the tank by drilling a hole and using an appropriate tank connector. Vent pipe should be 2" to air or via a Pump Technology MicroVent.

DATA SHEET DRAINKING 730 HES TWIN (240V) (Duty/Standby Hot Wastewater Pumping System with Control Panel)

Pump:

- Safe to run dry
- 30 mm free passage
- Hot water up to 90°C (Rated for continuous operation)
- Controllable oil chamber
- SiC mechanical seal independent of sense of rotation
- Replaceable moisture sealed cable inlet

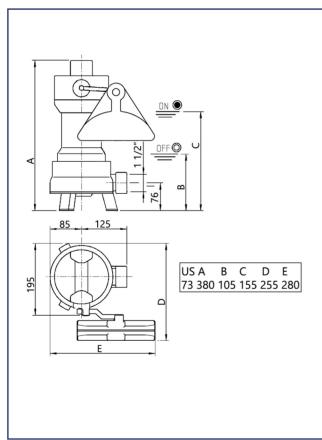

Description:

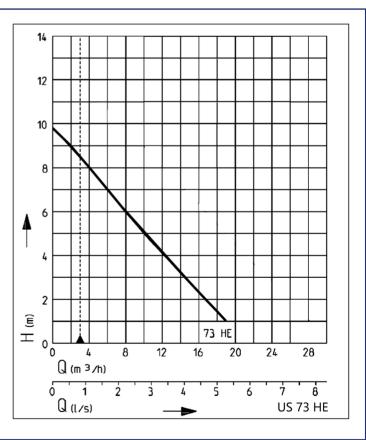

The heavy duty centrifugal submersible drainage pump US 73 HES is suitable for dealing with wastewater and capable of handling soft solids up to 30mm in particle size.

The Pump is rated for continuous operation for very hot wastewater up to 90°C.

Dimensions/switching points US 73 HES (mm)

Notes:

- This unit is for wastewater only
- Ensure the location of the DrainKing enables the lid to be easily removed for regular inspection and maintenance
- If the discharge pipework connection to a soil stack, manhole etc. is below the discharge outlet of the tank, an anti-syphon unit must be fitted at the highest point of the discharge pipework
- Warranty: The DrainKing 730 HES Twin (240V) comes complete with a one year warranty.
